Personal Summary

As an ex professional-athlete, I spent a number of years in a highly demanding and competitive environment. I am a proactive and an excellent communicator, who works well under pressure. A career in professional sport has developed a continued willingness to set and maintain a high standard of excellence in anything I do.

My experiences in sport have identified many transferable skills that I have been able to effectively apply to the workplace across various roles. I am a highly motivated, reliable, goal-setting individual that embraces hard work and Leadership.

Web Development Projects

PodFast, *Le Wagon final project*

A **Ruby on Rails progressive web application** for mobile, which helps people on the go find and choose podcast episodes quickly.

Compared to currently available apps, Podfast has improved search preference flexibility, and includes episode likes, listens and friend recommendations. Built with Spotify Integration, an in-app social platform, play or 'Pod'listing, and a vanilla **JS / AJAX front-end**.

Nomad, *Marketplace App*

A **Ruby on Rails Web Application** based on AirBNB, for adventurers looking for unique accommodation (including refuges, huts, yurts and tepees,) in highly remote locations. Built with user authentication (Devise), **geocoding** and **map APIs**, and **Algolia** location search features.

Mister cocktail

Website to store, edit and show your cocktail recipes. Built with Ruby on **Rails, SQL, HTML, CSS, Bootstrap**.
